

AYE MYAT MON

LEAD BUSINESS ANALYTIC | PRODUCT OWNER

PROFILE

Results-driven Senior Business Analyst & Agile Product Owner with over 12 years of telecom industry experience. Expert in transforming complex requirements into actionable business logic, building production-grade BI frameworks (SQL, Power BI, Python), and driving data-backed ROI modeling. A strategic collaborator skilled at aligning cross-functional engineering teams and C-level executives to optimize resource utilization.

WORK EXPERIENCE

Huawei Thailand

2025 - PRESENT

Senior Business Analyst & BI Lead

- Translated complex multi-regional technical requirements into actionable business logic for a high-profile 5G Network Consolidation project, optimizing regional resource utilization.
- Prioritized investments in top-tier commercial zones using data-driven modeling for the In-Building Coverage project to maximize localized corporate ROI.
- Designed production-grade Power BI dashboards and SQL analytics frameworks to stream real-time network capacity, coverage, and traffic metrics for executive decisions.
- Utilized Python and SQL for network performance forecasting, trend tracking, and anomaly detection to guide infrastructure investment.
- Facilitated alignment workshops across Network Engineering, Commercial Planning, and C-level stakeholders to steer regional transformation roadmaps.

ATOM Myanmar (formerly Telenor)

2024 - 2025

GEO Marketing Analytic Manager

- Leveraged advanced GIS tools to analyze geographic, demographic, and consumer behavior datasets, defining strategic blueprints for new network coverage rollouts.
- Pioneered performance monitoring frameworks to identify underperforming localized sites, collaborating with Sales and Network teams on data-backed corrective interventions.
- Orchestrated targeted geo-marketing campaigns by performing predictive analysis on regional festivals, competitor footprint shifts, and cultural seasonality trends.
- Managed comprehensive master geographic and network site databases using Advanced Excel to deliver high-fidelity data visualization for C-level executives.
- Delivered analytical support for Go-To-Market (GTM) schemes, utilizing traffic patterns to design customer promotions that accelerated acquisition in newly covered areas.

SKILLS

Technical & Data Skills

- Business Intelligence (BI) & Analytics
- SQL & Python
- Power BI & Advanced Excel
- Data Modeling & Forecasting
- Predictive Analytics
- Geospatial & Demographics Analysis (GIS)
- Process Automation (VBA & RPA)
- Dashboard Design & Data Visualization

Product & Project Management

- Agile & Scrum Methodologies
- Product Ownership
- (BRD, FRD, SRS)
- Cross-Functional Leadership
- Stakeholder Management
- Backlog Prioritization
- Workflow Mapping & Service Delivery

Business & Strategy

- Business Analysis
- ROI Modeling & Financial Analytics
- Market & Consumer Behavior Analysis
- Trend Tracking (MoM/YoY) & Anomaly Detection
- Network Optimization Planning
- Resource Utilization
- Strategic Blueprinting
- Vendor & Cross-Functional Alignment

LANGUAGES

- English (Fluent)
- German (Basic)
- Thai (Basic)

ACHIEVEMENT

- B5G Network Consolidation Project
- In-Building Coverage ROI Project
- BTS Tower Recovery & Revenue Relocation Project
- VIP Township Performance Upgrade
- Nationwide 2G/3G/4G end-to-end service quality improvement project

- Executed detailed Revenue ROI calculations for network expansion projects and spearheaded localized radio network expansion plans ahead of high-traffic regional events.

KDDI Summit Global Myanmar (MPT-KSGM) 2020 - 2024

Service Performance Analytic Deputy Manager

- Designed and executed a high-priority "BTS Tower Recovery & Revenue Relocation Project," identifying field bottlenecks to salvage critical corporate revenue.
- Built automated KPI dashboards and predictive models using data modeling and trend analysis (MoM/YoY) to forecast and prevent network degradation.
- Elevated 20 out of 35 top-revenue VIP Townships to "Rank 1" performance status by analyzing user traffic patterns and customer behavior to support targeted marketing campaigns.
- Led a departmental transformation by replacing manual reporting with Advanced Excel, VBA, and RPA frameworks, upgrading the team's analytics capabilities.

Telecom International Myanmar (Mytel) 2014 - 2020

E2E Mobile Service Quality Lead & Senior Business Analyst

- Acted as the primary strategic connector between C-level business units, internal technical teams, and global cloud vendors to map service delivery workflows.
- Authored comprehensive Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to drive digital transformations and network quality initiatives.
- Orchestrated the end-to-end project lifecycle for nationwide 2G/3G/4G optimization and automated capacity forecasting under tight timelines and budget constraints.
- Engineered scalable database logic and automated ETL pipelines to stream real-time key performance indicators (KPIs), drastically reducing manual reporting overhead and enabling predictive bottleneck discovery.
- Designed data-backed commercial frameworks and localized site interventions based on historical traffic patterns and competitive footprint shifts to capture untapped market share.

EDUCATION

Master of Business Management 2022 - 2024

Yangon University of Economic

GPA: 4.32 / 5.00

Bachelor of Electronic & Communication 2007 - 2012

Technical University Hmawbi

GPA: 4.63 / 5.00
